

Creating Technology

Specializing in polyurethane technology, we offer targeted polymer synthesis and material expertise tailored to optimize your end-product functionality.

- Structural engineering polymers
- Specialized solutions
- Material coatings
- Antimicrobial
- Hydrophilic
- Radiopaque
- Biodurable

Enabling Success

We are committed to our customer's success. From prototype stage through full-scale manufacture our team is focused

on providing innovative solutions for your most challenging projects. By combining material science and manufacturing technology AdvanSource Biomaterials is the advanced resource for your complex biomaterial needs.

Creating Technology. Enabling Success.
