

ADVANSOURCE BIOMATERIALS TO ATTEND THIRD ANNUAL BIOMEDevice EXPOSITION

Wilmington, MA. December 3, 2009... AdvanSource Biomaterials Corporation (NYSE Amex: ASB), a leading developer of advanced polymer materials for a broad range of medical devices, today announced it will be exhibiting at the 3rd Annual BIOMEDevice Exposition being held at the McEnery Convention Center in San Jose, California, from December 9-10, 2009. The Company will continue promoting its expanding line of innovative biomaterials focused on the product development needs of the medical device community.

Khristine Carroll, AdvanSource's Vice President of Sales and Marketing, stated, "Over the past few months we have had successful European exhibitions of our expanding portfolio of products including our first phase launch for ChronoSil™, our latest material introduction. The ChronoSil product family maintains the inherent benefits of a polycarbonate-based urethane, including high pressure resistance, tensile-strength and superior chemical resistance combined with silicone's industry-recognized advantages such as heightened elongation, superior elasticity and a low coefficient of friction. We now look forward to our domestic launch of this material as well as the opportunity to showcase our complementary products and services at the upcoming BIOMEDevice Show. We encourage medical device professionals and the investment community to sign-up for the Exhibit at www.devicelink.com/expo/biomed09/ and meet with us at this event."

BIOMEDevice is an MD&M event which brings together key contributors involved in investing, partnering, licensing, and developing business opportunities in the rapidly growing market for innovative healthcare products. Representatives of the Company's senior management and sales staff will be in attendance at booth 1015.

About AdvanSource Biomaterials Corporation

AdvanSource Biomaterials Corporation manufactures advanced polymer materials which provide critical characteristics in the design and development of medical devices. The Company's biomaterials are used in devices that are designed for treating a broad range of anatomical sites and disease states. AdvanSource's business model leverages its proprietary materials science technology and manufacturing expertise in order to expand its product sales and royalty and license fee income. More information about AdvanSource is available at its website: www.advbiomaterials.com.

Forward-Looking Statements

AdvanSource believes that this press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are based on management's current expectations and are subject to risks and uncertainties that could cause results to differ materially from the forward-looking statements. For further information on such risks and uncertainties, you are encouraged to review AdvanSource's filings with the Securities and Exchange Commission, including its Annual Report on Form 10-K for the fiscal year ended March 31, 2009 and its Quarterly Reports on

Form 10-Q for the quarters ended June 30, 2009 and September 30, 2009. AdvanSource assumes no obligation to update any forward-looking statements as a result of new information or future events or developments, except as required by law.
